

## **Rate Your Confidence in Fire Prevention**

On average there are over 3800 fires across U.S. Campuses each and every year. How confident are you that everything has been done on your property to reduce the risk and cost of fires and fire prevention.

## **Calculate Your Overall Confidence level**

Add your score, are you in the green?

## Your Total Score

46 to 60 = Well Protected

26 to 45 = Gaps in the Plan

1 to 25 = High Risk

## **Calculate What's at Risk**

If you had a fire, what do you estimate it would cost the business? Consider a best- and worst-case scenario to understand the true scale of the risk.

Cost Categories	Notes	Estimated Best- and Worst- case Costs
Physical Damages	Industry average: \$27,000	
Medical Costs	Industry Average: \$84,678	
Legal	Consider: lawyer fees, administration, settlements	
Regulations	A willful OSHA violation in 2023: \$156,259	
Business Interruption	Consider if you must close your doors (max) vs having to close an area such as the data center, amenities, or services.	
Brand	Lifetime customer value X 1 customer, 10, 100.	
Total: How will t	nis impact the bottom line?	

Whether you're in the green and feel you could do a bit better, or down in the red and trying to figure out what's next, a quick consultation with our team is a great next step to level up your businesses fire prevention.

<u>Contact us</u> today to learn more and discover our Early Adopters Program for our first group of users! It is possible to be confident that everything has been done to reduce the risk and cost of a fire, but its trusted solutions like Command Center that will get you there.
