

# A Large Canadian University Campus

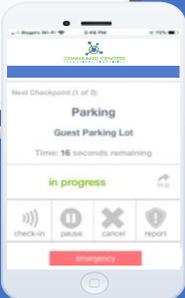

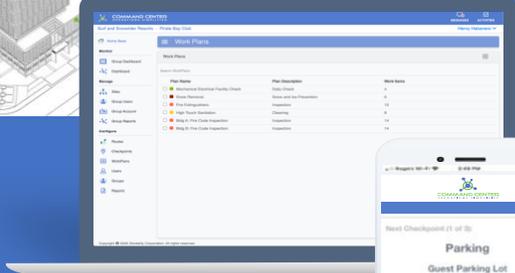

“Using Command Center, we will have **accurate real time data** on all fire extinguishers on campus and it will **give us the confidence and security that no extinguishers were missed.**”

Fire Protection Co-ordinator

COMMAND CENTER

*Helping save **lives, money** and **time**, one job at a time!*

## Where **Campus Safety** is a **Top Priority!**

Located in Canada, this university offers undergraduate and graduate programs in more than 50 areas of study and has 85 specialized research centres. Undergraduate and graduate degree programs are offered in the Faculties of Arts and Social Sciences, Public Affairs and Management, Engineering and Design, Science and Graduate Studies and Research and through many professional schools and institutes.

Campus Safety is a top priority with the objective to improving the quality of life through a community partnership which promotes a safe and secure campus.

Enrolls over 25,000 undergraduate & 3,500 graduate students.

Its campus is situated on over 150 acres and includes over forty buildings.

## The Challenge

As part of their ongoing commitment to improving campus safety, the Emergency Management team is taking a closer look at their policies and procedures associated with fire prevention and how they can be further improved.

Fire Prevention is complicated with over 2000 fire extinguishers alone, that must be inspected monthly to ensure they are in, proper working order, in the right location, for when they are needed and of course in compliance with the provincial fire code.

Like all campuses, they are currently managing compliance of the monthly fire extinguisher inspections, with walk-throughs that are tracked on the fire extinguisher tags for future reference.

The challenge is, without inspecting the inspections, management can't be confident that each extinguisher was located and inspected. At any given point they can't confirm where staff are in the process and if they will be able to complete the job. And when the fire inspector arrives, data collection is manual, labour intensive and difficult to verify.

## The Solution

Command Center is cost-effective, mobile solution for front line workers, which reduces the costs and complexity of managing adherence to the operating legislation, property insurance policies, and the brand standards that define operating requirements needed to reduce risk.

Using Command Center from Zendelity, initially the university will start with managing the monthly fire extinguisher inspections, to ensure nothing is missed and reduce the risk and implications of an incident.

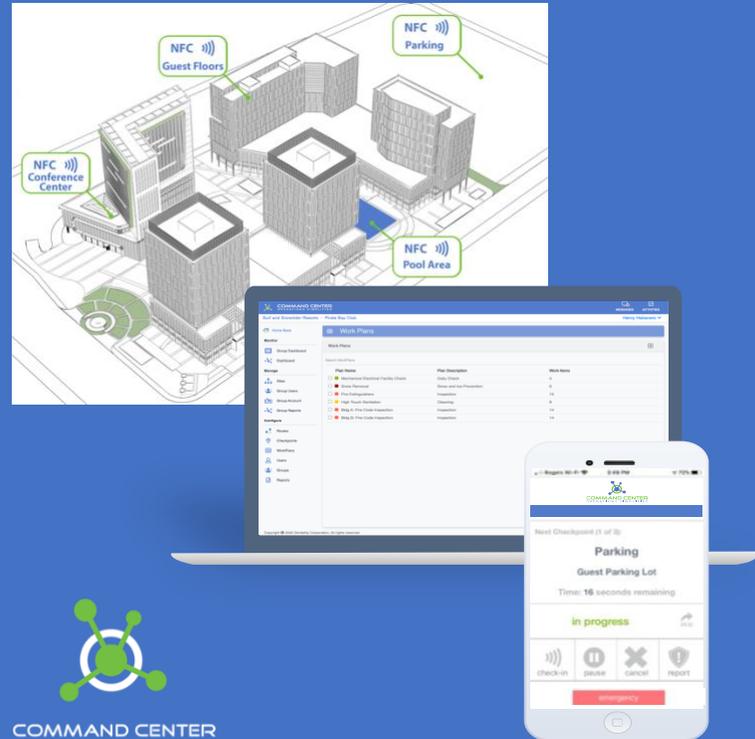

They then plan to expand their usage of Command Center to manage compliance with all the daily, monthly, and annual Provincial Fire Code requirements and then expand into the area of environmental management.

*The **Right People**,  
in the **Right Place**,  
at the **Right Time**,  
to get the **Right Job Done!***

## The Benefits

- Improve campus safety and accountability, by measuring and monitoring compliance down to the task/job level.
- Optimize resources and ensure work plans are executed and completed in accordance with best practices.
- Improve inventory management and return on investment with a cradle grave reporting for safety tools.
- Reduce administrative workload, and facilitate data driven discussions with a single system of the truth for fire prevention.
- Demonstrate to their students and faculty their commitment to campus safety with real-time dashboard and historical reporting.
