- Reduce the number of physical inspections required to ensure quality standards.
- Reduce the resources and time required to prove due diligence.

The Market Leader in
Physical Operating Compliance

All **Properties** Face a **Diverse Set of Risks!**

Today, all operations must prepare and protect their people and property from the threat of terrorism, natural disasters or pandemics and risk of health and safety and environmental incidents. Fines, insurance premiums and settlements are on the rise, making non-compliance a risk, no one can afford. Yet, today many still manage operating compliance with antiquated logbooks, checklists, and manuals exposing operations to increased risk, and the probability of errors, omissions and accidents.

Command Center from Zendelity is a cost-effective, mobile solution designed for front line workers to manage physical operating compliance. Command Center:

- Improves on-site safety by ensuring compliance with operating regulations, property insurance policies, and brand standards.
- Improves operating efficiency and accountability with simplified front line communications.
- Creates an enterprise system of record on physical operating compliance, for improved insight on operations and compliance.
