

“Using Command Center, we will have **accurate real time data** on the status of operations across the district to facilitate **data driven discussions** and enable us to **proactively identify issues before they negatively impact students and faculty.**”

Robert Malkowski  
Director of Operations

Helping save **lives, money** and **time, one job at a time!**

## Where **Student & Faculty Safety** is a **Top Priority!**

The Norristown Area School District (NASD), in Pennsylvania, USA, is dedicated to maximizing the growth and academic achievement of every student with continuous, research-based, and data-driven improvements in teaching and learning to ensure that all students learn to think creatively and critically, communicate effectively, and acquire the skills needed to be productive citizens who contribute to our community and a diverse global society.

Student and Faculty Safety and operational efficiency is a top priority at Norristown School District. The team is committed to ensuring proper governance of the district as well as the fulfillment of all federal, state and local legal requirements and mandates.

7468 Students

District: 15.9 Square Miles

12 Schools

## The Challenge

As part of Norristown's ongoing commitment to improving governance of the district as well as the fulfillment of all federal, state, and local legal requirements and mandates, the team is reviewing current policies and procedures to identify areas for improvement.

Like most districts, Norristown is currently managing physical operating compliance with logbooks, check lists, spreadsheets and manuals.

The challenge is, without constant inspections, management cannot be fully confident when each job was actually completed, how long it took and who did it. At any given point we can't confirm where staff are in the process and if they will be able to complete the job on time. And when government inspectors arrive, data collection is manual, labour intensive and difficult to verify.

## The Solution

Command Center is cost-effective, mobile solution for front line workers, which reduces the costs and complexity of managing adherence to the operating legislation, property insurance policies, and the brand standards that define operating requirements needed to reduce risk.

Using Command Center, Norristown will assist us with measuring and managing physical operating compliance of the:

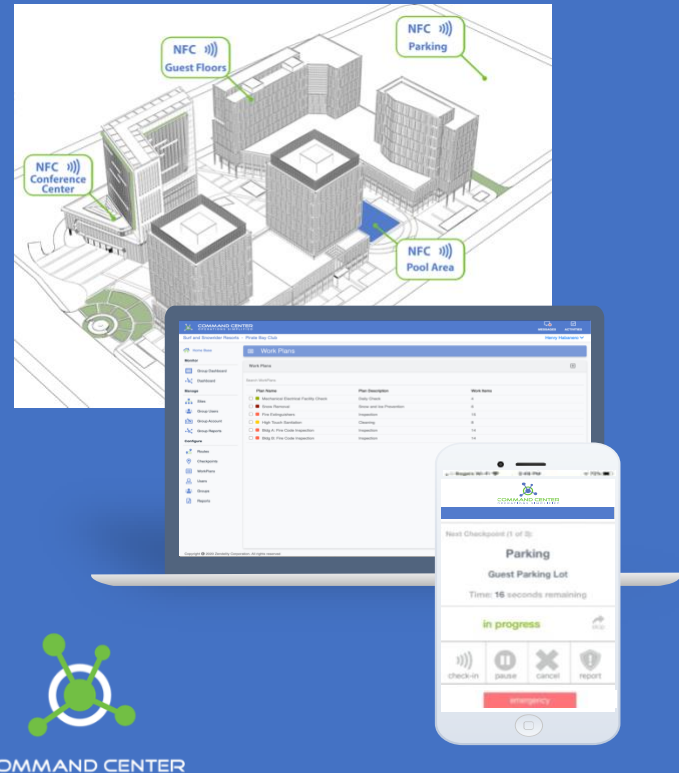

- Cleaning of the exhaust hoods to ensure the build-up of grease doesn't become heavy and create a fire hazard.
- Cleaning the ice machines to reduce the risk of legionnaires disease.
- Quarterly HVAC Filter Changes to ensure air quality.
- Preventative maintenance on snow equipment and ride-on / walk behind cleaning machines to improve ROI.
- Boiler room visual inspection, to ensure proper function.
- Monthly roof inspection to ensure drainage is clear and reduce the risk of water damage.
- Yearly fire extinguisher inspections to ensure performance and availability when required.
- Monitoring fixed assets to ensure compliance with Government grants.
- Daily bus 6-point safety inspections to ensure student safety.

*The **Right People**,  
in the **Right Place**,  
at the **Right Time**,  
to get the **Right Job Done!***

## The Benefits

- Confidence of physical operating compliance with federal/state/local legal requirements & mandates.
- Reduce the risk/cost of physical injury, damages, and/or environmental incidents.
- Improve operational efficiency by ensuring staff adhere to best practices.
- Ensure accurate vendor billing and reduce the administrative overhead associated with operational reporting.
- Reduce the volume of physical inspections required to ensure quality standards.
- Reduce the administrative overhead and time required to prove due diligence with a single version of the truth.
